

BEVELBACK WEATHERBOARD

Width: Cover = 812mm Sheet = 842mm.
 Applications: Commercial and residential.
 Orientation: Horizontal wall cladding only.

Manufactured in Palmerston North. Available nationwide.

FASTENING PATTERN

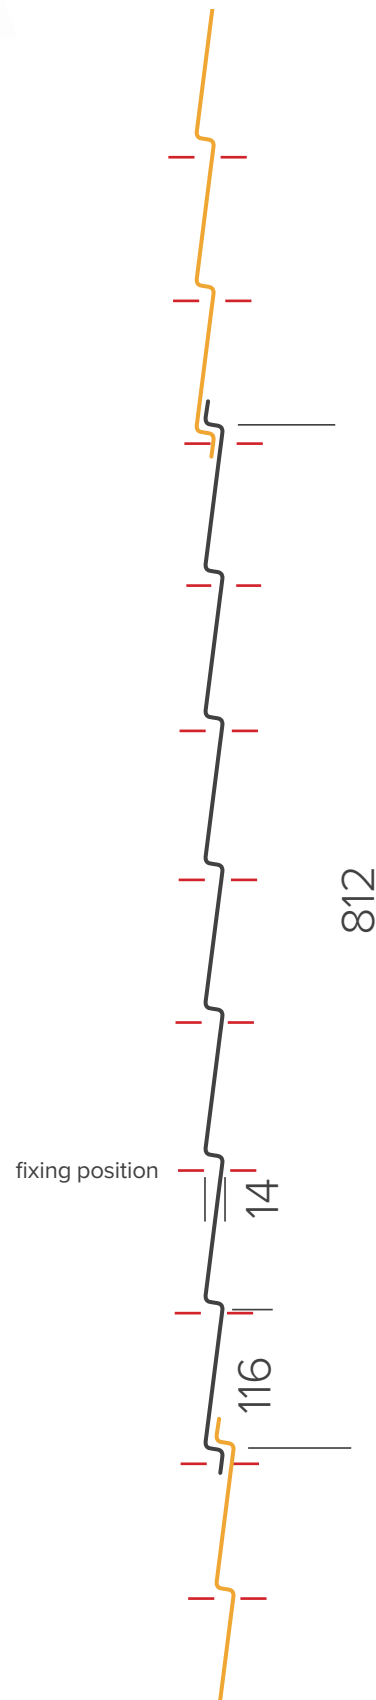

Bevelback to be fixed on every bevel at positions shown to the right.
 10-12 Gauge length to suit with a minimum 30mm embedment into timber.

SHEET LENGTHS

The NZMRM Code Of Practice states maximum sheet length for galvanized steel with normal fixing patterns should be a maximum of 15m.

Metalcraft Roofing's Bevelback sheet lengths to be 15m or less.
 For longer lengths then a vertical butt joint detail can be used.
 Refer to Metalcraft Roofing's standard details.
