METAL TILES

Metalcraft Metal Tiles are manufactured from the base core of Zincalume® steel. Our colour range is produced from a proven paint system supplied by NZ Steel.

Shake Tile with a chipped coated finish

Rest assured that when you choose a Metal Tile from Metalcraft Roofing you choose a product that is manufactured from one of New Zealand Steel Limited's trusted brands. For over 60 years Metalcraft Roofing has been sheltering families from New Zealand's extreme environment. Our long standing history and solid material warranties, backed by New Zealand Steel, give you assurance of quality and peace of mind, knowing that your new metal tile roof will endure for many years to come.

A typical lightweight metal tile weighs just 1/16th of the weight of a conventional tile. This reduces the amount of timber required to reinforce your roof trusses providing a considerable cost saving in design and materials.

PROFILES

Metalcraft Metal Tiles are designed to withstand environmental extremes so they afford considerable peace of mind. The interlock and overlap panels unique to metal tiles are secured in place with a horizontal fixing system. Fastenings are situated at 90 degrees to the tile surface providing resistance to wind lift from hurricane force winds and earthquakes. They are also highly resistant to storm damage in the form of hail, and although they may dent, they will not crack or leak as a result of hail contact. Metalcraft Roofing's metal tile range is available in both chip coated or pressed Colorsteel®. Steel is a recyclable product, so you can be confident in the knowledge that it does not have to be disposed of in landfill. Instead it can easily be recycled and reused, thereby minimising resource use and reducing impact on our environment.

CHATEAU

12 degrees pitch, min.

Scalloped finish for a timeless look to any style home.

Prepainted or stonechip finish.

Complemented by a range of flashing and trim options.

MODENA

12 degrees pitch, min.

Eye-catching option that affords the look of a heavyweight tile roof but eliminates the extra costs of reinforced roof trusses necessary for heavyweight roofing.

Prepainted or stonechip finish.

Complemented by a range of flashing and trim options.

SHAKE

15 degrees pitch, min.

Traditional Shake profile.

Prepainted or stonechip finish.

Complemented by a range of flashing and trim options.

RE ROOFING IS A GREAT WAY TO REFRESH THE LOOK OF YOUR HOME AND PRESERVE ITS VALUE, WHILST PROTECTING YOUR INVESTMENT.

When it comes to re-roofing, Metalcraft offer expert advice and specialised knowledge, so you can be assured of a quality job and outstanding workmanship. We will carefully assess your roof and advise you of the best and most economical course of action. Metalcraft strives to conduct all work promptly and diligently to minimise any inconvenience and disruption to your daily life, and we always endeavour to ensure you are completely satisfied with the end result.

TRIMS & FLASHINGS

Trims are used on hip, ridges and gables and are compatible with all roof tiles, however it is important to inform your sales rep which you prefer as soon as you can.
